

One important factor for the shop owner is the cost element for price labelling. Using price guns, labelers and corresponding price labels is the most favourable and inexpensive way to price your articles and products. As distributor for price guns of the brands "BLITZ" and "PREVAIL" we offer a large range of high quality and low cost price hand labelers. Our range comprises more than 50 different models for any pricing application including one line, two lines and three lines labelers. The corresponding labels are available off-the-shelf in various adhesions, colours and sizes.

Reliability of the pricing device is another important factor for a shop keeper. Our price guns comply with this requirements superior. The brand BLITZ is a most reliable labelling machine working without maintenance for years. The body is of hard plastics, all parts are made to high precision, allowing a long durability even for heavy duty applications. As distributor for these labelers, we have all spare parts and accessories in stock all the time.

High flexibility of the pricing gun and an excellent readability of the labels are two additional factors for the choice of your labeler. Due to the large number of different price guns, our assortment offers you products for maximum flexibility to your requirements. The digits of the labeler can be made to your needs, including currency symbols (€, Pound, Fr.), cloth sizes (X, M, L, S) or weights and measures (g, kg, m, l). The rubber bands are made of high quality rubber and guarantee best printings for a long time.

One-line printer

One line price guns are the most popular labeling machines in our range. This printer are used for pricing only.

Various different models and series are available for your choice. The series differ according to the size of the labels, the models have different combinations of the digits. One line printers can be supplied for many standard labels ranging from 22x12 to 37x19 mm. The number of digits depends on the series, up to 14 digits are possible in one single line.

Another important application for one line printers is the printing of expiry dates. With a preprinted label, you can easily print "Best before:" and a date on one label starting with 26x12 mm.

Two-line printer

During and after the conversion of the single currencies into Euro, two line printers were most popular to print both currencies on one single label. But even after this period of double-pricing, these kind of printers are often used for various labeling applications.

The first main application is the printing of expiry dates and prices on one label. The first line with smaller digits is used to print the date while the second line with larger digits is used for the pricing information. With preprinted labels, additional information like "Best before:" or similar imprints are used for even more customer information.

A second important application for two line price guns is the printing of two prices, either for special prices (standard price in the first line, special price with larger digits in the second line) or for special price offers by larger purchase quantities.

Last but not least, two line price guns, especially labelers of the series "L" and "T" are used for a combination of product information and price information. With preprinted labels, a lot of information can be printed on one label. This labeling machine is often used in grocery's or within the food industry, where expiration date, date of manufacture or capacity must be printed on the product.

Advantages

- Extremely robust plastic body – sturdy construction
- Easy to use band selector
- Lightweight
- Label roll in protective cover
- Easy to load - labels can be changed within seconds
- high speed printing, quick label result
- complete assortment for the most different label dimensions
- Big model availability
- High flexibility due to the large range
- Pricing and date marking with one single printer possible
- Special rubber bands for special markings (g, kg, pcs., m, X, L, M, S)
- Spare parts available
- Most printers off-the-shelf available

Applications

- clothes shop and fashion shop
- body shop,
- butcher's shop, bakery, grocer's shop, tea shop
- chemist's shops
- electric shops, music shops, electrical supply stores
- entertainment electronic stores consumer electronics
- flower shops, pet shops
- furniture shops
- bookshops
- gift shops, picture shops
- retail shops of any kind

Alphanumeric price gun

Alphanumeric price guns are special labelling machines with figures and letters on each wheel. With this labeller, you can easily print entire words, article numbers with letters or similar information without having to use more expensive preprinted labels.

Due to the large number of different symbols on each band, you will have to set the symbols different to other price guns. A small calculation table shows you how to set the right letters or figures. For example, when printing an A, you will have to set a T.

Blitz alphanumeric labelling machines

Price gun Blitz C10A

Number of wheels: 10A - Labels: 26x12 mm
